

ica 4 - aesthetics

January 22, 2025 11:33 AM

- hole pattern on top could be in a pattern that is more aesthetically pleasing rather than just a grid
- Fillets on outside edges of device
- Fillets on holes
- minimize gaps between top (white) and bottom (blue)
 - o make sure gaps are consistent
- ergonomics: maybe shape the device to a person's hand
 - o more comfortable to press your hand against
- redesign so the use is more obvious
 - o show the user that they are supposed to press down on it
 - o show the user that chalk is dispensed from the top
- use plastic as it is sufficient for this application
 - o could use metal for more premium feel
